SUMMARY

- 5+ years experience in UX/UI design, enterprise platforms, and digital transformation.
 - Lead designer for PepsiCo's **ServiceNow Fulfillers platform redesign** (workflow optimization, navigation improvements, usability enhancements).
 - Contributor to the **global myPepsiCo intranet** (information architecture, content structure, cross-platform consistency).
 - Expertise in **UX strategy, user research, workflow analysis, information architecture, and interaction design**.
 - Strong collaboration with **engineering, product management, stakeholders, and cross functional teams**.
 - Skilled in designing **scalable, accessible, and cross platform** solutions for **complex systems**.
 - Experience across enterprise and consumer products, including CULTURATE, Amorea, and other multi platform applications.
 - Focused on **process simplification, usability, efficiency, and user centered design**.
-

WORK EXPERIENCE

ESM SR. UX/UI DESIGNER

PEPSICO

2023 - Present

- Owning the strategic redesign of the Fulfillers platform in ServiceNow, a mission critical system that supports all internal service request operations at PepsiCo. The initiative aims to reduce training time, increase task efficiency, and eliminate friction for both new and experienced Fulfillers.
- Leading a multidisciplinary design team and orchestrating a research driven roadmap that includes discovery, workflow analysis, IA restructuring, prototyping, stakeholder alignment, and iterative validation.
- UX redesign of PepsiCo's global intranet (myPepsiCo), a large scale transformation impacting the entire employee population worldwide. While simultaneously building a comprehensive Design System to ensure long term scalability and design consistency.
- Drove major improvements in navigation and findability by leading user research efforts. Conducted Card Sorting exercises to redefine the mega menu taxonomy, reducing the average click path to high value information from 14+ clicks to just 6.

- Implemented WCAG 2.1 AA accessibility standards across intranet and ServiceNow experiences, ensuring inclusive access for employees with diverse abilities.
- Designed and delivered a fully cross platform experience web, iOS, and Android, from the ground up. Ensured alignment across all platforms through rigorous prototyping in Figma, accelerating stakeholder approval and validation.
- Acted as the dedicated design owner within an Agile environment, writing and refining detailed User Stories in Azure DevOps (ADO) to translate design intent into clear, actionable requirements for engineering teams.
- Bridged the gap between design and development by demonstrating technical feasibility through live HTML and browser developer tools adjustments, ensuring implementation remained faithful to Figma specifications. Ensured full alignment with ServiceNow standards to optimize development efficiency.
- Designed components and patterns within the Design System with built in accessibility requirements, supporting long term compliance and scalability.
- Established accessibility best practices across all digital touchpoints, significantly improving the experience for employees with disabilities.
- Enhanced the content ecosystem by developing standardized guidelines for content owners across all intranet microsites, driving consistency and relevance at scale. Supported personalized experiences so employees only receive content specific to their geographic location (e.g., Mexico specific content for employees in that region).

SR. UX/UI DESIGNER

UNIMEX Financiera

2022 - 2023

- Conducted usability tests and collaborated with development teams to improve user experience.
- Ensured accessibility compliance and optimized content strategy.
- Monitored performance metrics to track the success of design changes.
- Developed and implemented A/B testing strategies that improved user interface performance.
- Regularly presented design concepts and findings to senior stakeholders, securing buy-in and ensuring alignment with organizational objectives.
- Collaborated with content creators to develop a unified content strategy, improving user comprehension and engagement on key pages.
- Designed and implemented an intuitive chatbot that allowed users to answer their questions independently without needing to interact with an agent. This solution significantly reduced the workload for the customer support team and improved user satisfaction by providing quick and easy access to information.

UX/UI DESIGNER

CULTURATE

2022 - 2022

- Partnered with a team of designers to create an interactive mobile app prototype, refining the user experience based on continuous feedback.
- Conducted comprehensive user research, including interviews and surveys to develop detailed personas and understand the needs and behaviors of the target audience.
- Created and iterated interactive prototypes in Figma, validating design decisions through user testing.
- Collaborated on the app's visual identity, selecting color palettes, typography, and iconography to ensure an aesthetically cohesive and brand aligned experience for CULTURATE.

PRODUCT DESIGNER

State Government Chamizal Park

2021 - 2021

- Redesign of various infrastructure elements in Chamizal Park, Cd. Juárez, México, as part of a collaboration with the state government. This project involved the redesign and remodeling of park amenities, including benches, swings, workout areas, and a dog park, with the goal of enhancing both functionality and aesthetics across the park.
 - Contributed to the design and development of common areas, such as bike parking and campfire areas, ensuring seamless integration with the park's overall layout and theme. This work focused on creating engaging, accessible spaces for visitors.
- Collaborated closely with the lead architect, state government, and civil engineers to ensure alignment with project objectives and the successful execution of the remodeling plan.
- Developed detailed 3D visualizations and prototypes using SolidWorks, a 3D modeling software, and rendered designs in Keyshot to create realistic representations of proposed infrastructure changes, facilitating clear communication and stakeholder approval.
 - By actively contributing to the project, I helped improve the park's amenities and create functional, visually appealing spaces for the community to enjoy.

EDUCATION

Master's Degree in User Experience Design

Universidad Internacional de la Rioja (UNIR).

2024 - 2025

Bachelor's degree in Industrial Design

Universidad Autónoma de Ciudad Juárez (UACJ).

2016 - 2021

LANGUAGES

English - Fluent

Spanish - Native

CERTIFICATES

Learn HTML Course - Codecademy

Build a Website with HTML, CSS, and GitHub - Codecademy

Certified SAFe 6 Practitioner

UX Design Certification - Digital House Academy

SKILLS

- User Research
- Usability Testing
- Interaction Design
- Wireframing & Prototyping
- Design Systems
- Heuristic Evaluation
- Mobile UX Design
- Cross platform Design
- ServiceNow
- UX Workflow Automation
- Process Optimization
- Information Architecture (IA)
- Accessibility (WCAG)
- Component Libraries
- HTML/CSS
- Agile / Scrum
- Google Analytics
